Description

Legendary West Australian fishing boat RePowered with a Mercrusier 3.0L TKS engine and an [Alpha Gen 2 Drive](#) by Hitech Marine in Perth. 33 was achieved on its initial water test whilst using a lot less fuel and running much quieter than the old Volvo engine knots. The owner was so delighted with his Repower with Hitech Marine that he sent us the following [review / testimonial...](#)

Hello Tony,

We took the boat out on the river on Saturday from Maylands through Fremantle & out of the heads for a couple of miles & back to Maylands. The new motor performed beautifully.

We now have instant response through the throttle & steering with increased power with good fuel economy.

We have never had the boat above 30 knots before & it got there smooth & effortlessly.

I would like to thank you & the rest of your crew for your service & look forward to many years of trouble free motoring.

Best regards,

Phil Anderson
